What you agree to

What to expect

Dermaplaning uses a sterile, single-use blade held at an angle to remove fine facial hair and the top layer of dead skin. It doesn't hurt for most people. The hair grows back over the next weeks.

Initials

Risks

Dermaplaning can cause redness, sensitivity, small nicks or cuts, breakouts, and rarely infection. If my skin reacts I'll contact the studio, and my doctor for a medical concern.

Initials

Results

Results vary from person to person and from one visit to the next. The studio doesn't promise any particular result or number of visits.

Initials

Sun after treatment

My skin is more sensitive to the sun after this treatment. I'll follow the studio's sun care steps, including daily sunscreen.

Initials

My answers

I answered the health questions truthfully. I'll tell my esthetician before my appointment if anything changes.

Initials

Stopping

I can ask my esthetician to stop at any time, and my esthetician may stop or change the service if my skin reacts.

Initials

Appointment policy

Please give the studio at least 24 hours' notice to move or cancel your appointment. Arriving late may shorten your appointment so the next client starts on time.

Initials ☐

the studio uses your health answers only to do your appointment safely and to keep the records the law requires. They are never used for marketing or sold. They are stored encrypted, and every time someone at the studio opens them it is logged.
